Considere los conjuntos $A = \{1,2\}$ y $B = \{1,2,3\}$. Calcule

$$P(B - A) \text{ y } P(B) - P(A)$$

$$A = \{1, 2\}$$

$$B = \{1, 2, 3\}$$

$$B - A = \{3\}$$

$$P(B - A) = \{\emptyset, \{3\}\}$$

$$P(A) = \{\emptyset, \{1\}, \{2\}, \{1,2\}\}$$

$$P(B) = \{\emptyset, \{1\}, \{2\}, \{3\}, \{1,2\}, \{1,3\}, \{2,3\}, \{1,2,3\}\}$$

$$P(B - A) = \{\emptyset, \{3\}\}$$

$$P(B) - P(A) = \{\{3\}, \{1,3\}, \{2,3\}, \{1,2,3\}\}$$
